Materiality

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively;
3. Some events may not be material individually but may be found material collectively;
4. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

- 1. Inventories and trade receivables form a major part of our current assets and net worth. Failure to manage our inventory and trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.**

We are in the business of trading of foodgrains, coal and fly-ash. Our Company's business is working capital intensive and hence, inventories and trade receivables form a major part of our current assets and net worth. The results of operations of our business are dependent on our ability to effectively manage our inventory (traded goods) and trade receivables.

To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. However, if our management misjudges expected customer demand, it could cause either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we purchase, we may be required to write-

down our inventory or pay our suppliers without new purchases, or create additional vendor financing, all of which could have an adverse impact on our income and cash flows.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and dealers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

For further details of our business, please refer to chapter titled “Our Business: beginning on Page 83 of this Draft Prospectus.

2. Our limited operating experience, limited recognition in new markets and in the agriculture products industry may limit our expansion strategy and cause our business and growth to suffer.

Our company was incorporated on April 13, 2018, with Registrar of Companies, Gwalior. We have commenced our operations in Trading in Food Grains. With our limited operating history, potential investors may not be able to analyse our past performances or future prospects. For further details of our financial position and information please refer to section titled "Financial Information of the Company" on page 117 of this Draft Prospectus.

Further, we have a limited number of customers and limited experience in operating our products in these markets and we may face risks in relation to delayed acceptance of our products due to limited recognition. We may also face risks in expanding our operations in geographic areas in which we do not possess the same level of familiarity with the economy, consumer preference, commercial operations and distribution network and with product offerings that we have limited operating experience of. In addition, our competitors in such geographic areas may already have established operations in such geographic areas and particularly in the agriculture and related market, and we may find it difficult to attract customers in such geographic areas.

Our expansion plans could be delayed or abandoned, could cost more than anticipated and could divert resources from other areas of our business or divert management's attention from other aspects of our business and place a strain on our management, operational and financial resources, as well as our information systems, any of which could impact our competitive position and reduce our revenue and profitability. For further details of our business, please refer to the chapter titled “Our Business” beginning on page 83 of this Draft Prospectus.

3. We operate in highly competitive business sectors in the Indian market, and in case we are not able to compete effectively, there may be material adverse effect on our financial condition, results of operations and our business.

Our trading business segment is highly competitive in India. Factors affecting our competitiveness in this segment include, among other things, price and availability of products, customer satisfaction, marketing strategies, accessibility and reliability. Some of our competitors have significantly greater financial, marketing, personnel and other resources than us and better brand recognition in the Indian market. As such, from time to time we may be required to reduce prices to effectively compete and to maintain our market share. If we are unable to compete effectively with our competitors, our business may be materially and adversely affected.

For further details of our business, please refer to chapter titled “Our Business: beginning on Page 83 of this Draft Prospectus.

4. We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may adversely affect our operations.

We require certain statutory and regulatory approvals, licenses, registrations and permissions, and applications need to be made at the appropriate stages for our business to operate. Although we believe that we have obtained required license for carrying our business activity. There can be no assurance that the relevant authorities will renew these approvals or licenses in a timely manner. As a result, we may not be able to execute our business plan as planned. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations. Further our company is yet to apply for Shop and establishment registration and our food license which is required for selling food grain under our brand name is also expired. Government approvals, licenses, clearances and consents are often also subject to numerous conditions, some of which are onerous and may require significant expenditure.

Furthermore, approvals, licenses, clearances, and consents covering the same subject matter are often required at State Government levels. If we fail to comply, or a regulator claims that we have not complied, with these conditions, we may not be able to commence

or continue with work or operate these projects. For further information on various approvals or licenses required in connection with our operations, please see the section entitled “Government and other Approvals” on page 160 of this Draft Prospectus.

5. *There are outstanding legal proceedings involving our Directors and Promoters. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.*

Our Director and Promoters are involved in certain legal proceedings which are pending at different levels of adjudication before tax authorities. We cannot provide assurance that these legal proceedings will be decided in our Director and Promoters’ favour. Any adverse decisions in any of the proceedings may have a significant adverse effect on our business, results of operations, cash flows and financial condition. A summary of the pending civil and other proceedings involving the Company is provided below:

Cases against our Director and Promoters: -

Nature of Cases	No of Outstanding Cases	Amount involved (In Lacs)
Criminal Complaints	--	--
Statutory/ Regulatory Authorities	--	--
Other Litigation - Taxation	2	Not Ascertainable
Other Litigation	--	--

The amounts claimed in these proceedings are not ascertainable. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals will impact our Promoters and Directors. For further details of legal proceedings involving the Company, please see “Outstanding Litigation and Material Developments” beginning on page 156 of this Draft Prospectus

6. *We do not own some of our key properties which are used by us currently*

We operate from our registered office situated at House No.100, First Floor, Ward No.23, Infront of Thane Ajak Civil Line Road, Tikamgarh, Madhya Pradesh, India which is rented premise and we have obtained an NOC for use of such premises. In case of withdrawal of NOC, we will be required to locate new premises for our office. We may not be able to find the same in a timely manner. Further, even if we are able to locate a new premise, they may be on terms not favourable to us or not within the parameters of our requirements. Our inability to identify the new premises may adversely affect the operations and financial conditions of our Company. For details regarding such tenancy / rented properties, please refer to “Our Business – Properties” on page no. 83 of this Draft Prospectus.

7. *Any disruption in the supply chain could have an adverse impact on our business, financial condition, cash flows and results of operations.*

Our ability to procure and supply the products on time is critical in our business. Any disputes regarding pricing or performance, could adversely affect our sales, financial condition, and results of operations. In addition, any damage or disruption to our supply chain, including transportation, due to weather, natural disaster, fire or explosion, terrorism, pandemics, strikes, government action, or other reasons beyond our control. The occurrence of any of these factors could result in a significant decrease in the sales volume of our products and therefore adversely affect our financial condition, cash flows and results of operations.

8. *We have entered into short term business contract for the supply of our traded goods with some of parties and we are exposed to terms and conditions in such contracts. Also we does have long term contracts with other suppliers from which we also purchases our products.*

We currently have well established relations with our suppliers for procuring the traded goods from various parties for different types of products. We have entered in business contract with some parties for supply of our traded goods. Also we purchase the Products through auction. There are terms and conditions of the contracts which we have to adhere with our supplier for purchase of traded goods. There can be no assurance that there will not be a significant disruption in the supply of these traded goods from current sources, or, in the event of a disruption, that we would be able to locate alternative suppliers of the goods of comparable quality on terms acceptable to us, or at all. Identifying a suitable supplier involves a process that requires us to become satisfied with their quality control, consistency, responsiveness and service, financial stability and other ethical practices.

Any delay, interruption or increased cost in the supply of our traded goods pertaining to our products arising from a lack of long-term contracts with other suppliers could have an adverse effect on our ability to meet customer demand for our products and result in lower revenue from operations both in the short and long term.

9. *Failure on our part to meet consumer expectations could impact our business operations.*

Our business depends on consumer preferences which cannot be predicted with certainty and are subject to rapid change. We feel that if we fail to understand and in turn respond in a timely and appropriate manner to changing consumer demand with quality products, our quality of our product may decline and in turn result in decline in sales or leave us with substantial amount of unsold inventory. We may not be able to successfully meet changing consumer demands in future. In addition, any new products that we introduce in future may not be successfully received by retailers and consumers. Any failure on our part to successfully meet consumer demand or preference may negatively affect our business, financial condition and results of operations.

10. *We have an outstanding indebtedness, which requires significant cash flows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire.*

As of September 30, 2020, our short term borrowings were ₹ 18.02 Lacs and we will continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our ability to borrow additional amounts in the future;
- affecting our capital adequacy requirements; and
- Increasing our finance costs.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. For further details of our Company's borrowings, see "Financial Indebtedness" on page 155 of this Draft Prospectus.

11. *Our Company has not entered into any long-term contracts with any of its customers and we typically operate on the basis of orders. Inability to maintain regular order flow would adversely impact our revenues and profitability.*

Our Company has had long standing business relationships with certain customers and has been supplying our products to such customers, for past years. However, we have not entered into any specific contracts with these customers and we cater to them on an order-by-order basis. As a result, our customers can terminate their relationships with us without any notice and, without consequence, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. Although we place a strong emphasis on quality, timely delivery of our products and prompt, in the absence of contracts, any sudden change in the buying pattern of buyers could adversely affect the business and the profitability of our Company.

12. *Any failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may affect our operational flexibility, business, results of operations and prospects.*

As on September 30, 2020, our total secured borrowings amounted to Rs. 18.02 Lacs. Our leverage has several important consequences, including the following:

- A portion of our cash flow will be used towards repayment of debt, which will reduce the availability of cash to fund working capital requirements, capital expenditures and other general corporate purposes;
- Our borrowing cost and the existence of encumbrances on a significant portion of our assets may constrain. In the event of enforcement of an event of default in connection with such secured borrowings (which is not waived or cured), our ability to continue to operate our business at such locations may be restricted;
- Fluctuations in interest rates may affect our cost of borrowing, as all or a substantial part of our borrowings is at floating rates of interest; and

The termination of, or declaration or enforcement of default under, any current or future financing agreement (if not waived or cured) may affect our ability to raise additional funds or renew maturing borrowings to finance our existing operations and pursue our growth initiatives and, therefore, have an effect on our business, results of operations and prospects.

For further details of our loans, please refer chapter titled “Financial Indebtedness” beginning on Page 155 of this Draft Prospectus

13. We depend on a limited number of customers for a significant portion of our revenues. The loss of a major customer or significant reduction in production and sales of, or demand for our products from, our major customers may adversely affect our business, financial condition, results of operations and prospects.

A significant majority of our income from operations is from sales of products like food grains, coal and fly-ash in the domestic market. We depend on a limited number of customers for a significant portion of our revenues. Revenue from our top 10 customers constituted 97.65% of total sales for the period ended September 30, 2020. Demand for our traded products is related to various factors such as easy availability of finance, demand of specific commodities and the quality of same supplied by us. Any loss of client base, out of our existing clients, will impact our overall sales, resulting in a sharp decline in our revenues. Further, we face immense competition from other agri-commodity suppliers and processors, organized as well as unorganized, which may result in some of our customers reducing their orders to us. Any reduction in orders from our existing clients may result in a decline in our revenues. While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

14. Our company is substantially reliant on our Promoter/Director Mr. Manish Kumar Jain for mentoring. Our inability to continue to receive such support from our promoter could materially affect our company’s operations.

Our company is substantially reliant on our Promoter/ Director Mr. Manish Kumar Jain for funding needs and mentoring. Mr Manish Kumar Jain in the past has disassociated himself from certain of his companies. For details regarding his dissociation please refer section titled “Our Promoter and Promoter Group” beginning on page no 112 of this Draft Prospectus. Our inability to continue to receive such support from our promoter could materially affect our company’s operations.

15. Our failure to adapt to technological developments or industry trends could affect the performance and features of our commodities and reduce our attractiveness to our customers.

As our business grow in scope and size, whether through offering of new products or expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced products, features and functionality ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition. For further details regarding our business, please refer to chapter titled “Our Business” beginning on Page 83 of this Draft Prospectus.

16. Our operating results could be adversely affected by weakening of economic conditions due to lock-down in all parts of India and other parts of world & other situation due to pandemic covid-19.

Our overall performance depends in part on the economic conditions of India. Certain economies have experienced periods of downturn due to the present situation prevailing in India and outside India due to pandemic disease of Covid-19 which impact financial markets, concerns regarding the stability and viability of major financial institutions, declines in gross domestic product, and increases in unemployment and volatility in commodity prices and worldwide stock markets, and excessive government debt. The pandemic disease has adversely effected the trading business.

Moreover, the instability in the global economy affects countries in different ways, at different times and with varying severity, which makes the impact to our business unforeseeable and indeterminate. Any of these events, as well as a general weakening of, or declining corporate confidence in the global economy, or a curtailment in government or customer spending could delay or decrease our revenues and therefore have a material adverse effect on our business, operating results and financial condition.

17. Strikes, work stoppages or increased benefit or wage demands by our employees and labour could adversely affect our business and results of operations.

We may face increased labor costs because of competition for skilled employees, higher employee turnover rates, increase in minimum wages or employee benefits under applicable laws, our growth could be adversely affected. If we are unable to successfully negotiate with our employees or if there is any shortage or disruption in the availability of labor, it could result in work stoppages or increased operating costs. Our supply of labor may be adversely affected by, among other things, work stoppages and labor disputes. Such events may also increase the price of labor that we can source for our business operations. India has stringent labor legislation that protects the interests of workers, including legislation that sets forth detailed procedures for establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Although there is no labor union formed by our employees at the time of this Draft Prospectus, we cannot assure you that our employees will not unionize, or attempt to unionize in the future. Further, there can be no assurance that we will have adequate access to skilled workforce at reasonable rate and in the industry in which we operate. As a result, we may be required to incur additional costs to ensure the quality and timeliness of our services, which may in turn affect our results of operations.

18. We have had some errors in relation to regulatory filings to be made with the RoC and our company has made non-compliances of certain provision under applicable law.

In the past, our company has made some typographical errors in the forms which was filed in registrar of Companies. Although no show cause notice have been issued against our Company till date in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Also with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

19. Our Company's failure to maintain the quality standards of the products could adversely impact our business, results of operations and financial condition.

The demand for our products depends on quality that we sell. Any failure of ours to maintain the quality standards may affect our business. Although we have put in place strict quality control procedures, we cannot assure that our products will always be able to satisfy our customer's quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products or any other unforeseen events could adversely affect our reputation, our operations and our results from operations.

20. If we are not successful in managing our growth, our profitability may decrease and result in adverse impact on our business, results of operations and financial condition.

A principal component of our strategy is to continuously grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

21. We have not taken any insurance cover to secure our assets, any loss from unforeseen event will effect our financial condition and results of operations.

Our business, assets and stocks could suffer damage from fire, natural calamities, misappropriation / burglary or other causes, resulting in losses, which may not be compensated by insurance as we have not taken any insurance. Also there can be no assurance that the terms of our insurance policies which we will take in future will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, we are required to renew the insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, we may face significant uninsured losses. If we suffer a large uninsured loss or if any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

22. Our revenues are derived from sales made in the few states in India. Our growth strategy to expand into new geographic areas poses risks. We may not be able to successfully manage some or all of such risks, which may have a material adverse effect on our revenues, profits and financial condition.

Our operations have been geographically concentrated in few states. Our business is therefore significantly dependent on the general economic condition and activity in the State in which we operate along with the Central, State and Local Government policies relating to agri-commodity industry. Although investment in the agri-commodity industry in the areas in which we operate has been encouraged, there can be no assurance that this will continue. We may expand geographically, and may not gain acceptance or be able to take advantage of any expansion opportunities outside our current markets. This may place us at a competitive disadvantage and limit our growth opportunities. We may face additional risks if we undertake operations in other geographic areas in which we do not possess the same level of familiarity as competitors. If we undertake operations in different geographical locations than those currently is; we may be affected by various factors, including but not limited to:

- Adjusting our products to the new geographic area;
- Ascertaining the creditworthiness of the buyer and maintain credit terms with the same;
- Obtaining necessary Government and other approvals in time or at all;
- Failure to realize expected synergies and cost savings;
- Attracting potential customers in a market in which we do not have significant experience; and
- Cost of hiring new employees and absorbing increased costs.

23. We are dependent on a number of our key managerial personnel and other senior management, and the loss of or our inability to retain such persons could adversely affect our cash flows, business, results of operations and financial condition.

Our performance depends largely on the efforts and abilities of our key managerial personnel and other senior management, including our present officers. Their input and experience are invaluable for the development of our business and the operations and the strategic directions taken by us. We cannot assure you that we will be able to retain these key managerial personnel and other senior management or find adequate replacements in timely manner, or at all, should they chose to discontinue their employment with us. We may need a long period of time to hire and train replacement personnel when key managerial personnel and other senior management terminate their employment with us. We believe that competition for qualified managerial personnel with relevant expertise in India is intense due to scarcity of qualified individuals in the industry in which we operate. The retirement or resignation of any of our key managerial personnel may materially and adversely impact our business, results of operations and financial condition.

In addition, we cannot assure you that our relations with our employees shall remain cordial at all times and that employees will not undertake or participate in strikes, work stoppages or other industrial actions in the future. Any labor disruptions may affect our operations, thereby adversely affecting our business, financial condition and results of operations.

24. Our net cash flows from operating, investing and financing activities have been negative in some years in the past. Any negative cash flow in the future may affect our liquidity and financial condition.

Our cash flow from our investing financing activities and operating Activities have been negative in the past. Following are the details of our cash flow position during the last three financial years based on standalone restated financial statement are as follow:-

Particulars	For the period ended (in Lacs)		
	30.09.2020	31.03.2020	31.03.2019

Net Cash used Investing Activities	(9.22)	(0.55)	(1.85)

For details, please see the Chapters titled “Financial Information of Our Company” on page 177 of this Draft Prospectus. Any net negative cash flows in the future could adversely affect our results of operations and consequently our revenues, profitability and growth plans.

25. We have in the past entered into related party transactions and may continue to do so in future.

We have entered into certain transactions with related parties, including our Promoters and Promoter Group and may continue to do so in future. These transactions entered into with, amongst others, our Promoters, Promoter Group and Group Companies typically

relate to remuneration, purchases, payment of rent for use of property and advances & acceptance of loans etc. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.

There can be no assurance that we would not have achieved more favorable commercial terms with other parties. Furthermore, we may enter into related party transactions in the future, and such transactions may potentially involve conflicts of interest. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our results of operations and financial condition. For more information, see “Annexure X” - Related Party Transactions” under chapter titled “Financial Information of our Company” beginning on of the Company on page 117 of this Draft Prospectus.

26. In addition to normal remuneration, other benefits and reimbursement of expenses some of our Directors are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.

Some of our Directors are interested in our Company to the extent of their shareholding, interest and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our Directors would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby affecting our business and results of operations and prospects.

For further details of transaction with directors, Please refer chapter titled “Financial Information of the Company” beginning on Page 117 of this Draft Prospectus

27. Any Penalty or demand raise by statutory authorities in future will affect our financial position of the Company.

Our Company is mainly engaged in business of trading of goods which attracts tax liability such as Goods and Service Tax and other applicable provision of the Acts. However, the Company has been depositing the return under above applicable acts but any demand or penalty raise by concerned authority in future for any previous year and current year will affect the financial position of the Company. For detail, Please refer “Outstanding Litigation and Material Development” beginning on page 156 of Draft Prospectus.

28. We face foreign exchange risks that could affect our results of operations.

We face foreign exchange rate risk to the extent that certain of our sales are denominated in a currency other than the Indian Rupee. Because of our foreign currency exposures, exchange rate fluctuations between the Indian Rupee and foreign currencies, especially the U.S. dollar, can have a material impact on our results of operations, cash flows and financial condition. The exchange rate between the Indian Rupee and U.S. dollar has been volatile in recent periods and may continue to fluctuate in the future.

Fluctuations in the exchange rates may affect us to the extent of such orders being placed overseas by our customers. Our Company may enter into certain contracts to hedge exchange rate fluctuations which may or may not adequately cover the potential loss that may arise as a result of such foreign exchange transactions. Moreover, these hedges do not cover all such exposures and are in any event subject to their own risks, including counterparty credit risk. Adverse moves in exchange rates that we have not adequately hedged may impact our profitability and financial condition.

For further details of our financial statements, please refer to the chapter titled “Financial Information of the Company” on page 117 of this Draft Prospectus.

29. We have significant ongoing funding requirements and may not be able to raise additional capital in the future. As a result, we may not be able to respond to business opportunities, challenges or unforeseen circumstances.

Our major fund based and non-fund based financial assistance has been sanctioned by the bank, i.e. ICICI Bank on the security of Fixed Deposits. The Company is dependent on the ICICI Bank for its Working Capital requirement, any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. Additionally, this may result into difficulty in arranging for funds for re-payment and may also affect the financial position of the Company. If we are unable in the future to generate sufficient cash flow from operations or borrow the necessary capital to fund our future capital expenditures, we will be forced to limit our growth. In addition, we may not be able to service our existing

customers or to acquire new customers. The inability to raise additional capital on acceptable terms could have an effect on our business, results of operations and financial condition.

For further details of our loans, please refer chapter titled “Financial Indebtedness” beginning on Page 155 of this Draft Prospectus

30. *We have not independently verified certain data in this Draft Prospectus.*

We have not independently verified data from the Industry and related data contained in this Draft Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

31. *The agro business is highly seasonal in our country which effect some portion of our revenue and such seasonality may affect our operating results.*

The agro business is highly seasonal in our country. This is due to the fact that majority of the farmers depend on weather specifically for rabi crop and hence, the timing and seasonality of weather impacts the business of our Company. Thus, we are subject to seasonal factors for some of our traded products, which make our operating results unpredictable. Due to the inherent seasonality of our business, results of one reporting period (quarter/half year/year) may not be necessarily comparable with preceding or succeeding reporting periods. Sometimes, if there is a slight change in timing of seasons, the sales will get deferred from one reporting period to another reporting period. The sales that were supposed to take place during one financial year will be added to sales of the next financial year and therefore results of even full financial year may not necessarily be comparable to other financial year.

32. *Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.*

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges;
- changes in India’s tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighboring countries;
- occurrence of natural or man-made disasters
- prevailing regional or global economic conditions;

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

33. *We are subject to the risk of failure of, or a material weakness in, our internal control systems.*

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. In addition, several of our collection related processes are yet to be fully automated, which may increase the risk that human error, tampering or manipulation

will result in losses that may be difficult to detect. As a result, we may incur expenses or suffer monetary losses and may result in a material effect on our business, financial condition and results of operations.

34. *Our business is subject to risks related to weather, disease and pests that could adversely affect the results of our operations and our financial condition.*

Adverse weather conditions have historically caused disruption in agricultural operations and consequently in operating results by causing crop failures or significantly reduced harvests, thereby adversely impacting the agricultural produce. Severe adverse weather conditions, such as flood, draught, severe storms, may also result in extensive property damage, extended business interruption, personal injuries and other loss and damage to our business operations. Additionally, the potential physical impacts of climate change are uncertain and may vary by region. These potential effects could include changes in rainfall patterns, water shortages, changing sea levels, changing storm patterns and intensities, and changing temperature levels that could adversely impact our costs and business operations and the supply and demand for agricultural commodities. These extreme weather conditions can adversely affect our business operations.

35. *Our funds requirements are based on internal management estimates and on the basis of quotations obtained, wherever possible, and have not been appraised by any bank or financial institution. Any increase in the actual deployment of funds may cause an additional burden on our finance plans. We have not entered into definitive agreements to utilize our Issue proceeds.*

The fund requirement mentioned as a part of the Objects of the Issue is based on internal management estimates and on the basis of quotations obtained, wherever possible, and has not been appraised by any bank or financial institution or any external agency. These are based on current conditions and are subject to change in light of changes in external circumstances or costs or in other financial conditions, business strategy, etc. With increase in costs, our actual deployment of funds may exceed our estimates and may cause us an additional burden on our finance plans. As on the date of the Draft Prospectus, we have not entered into any definitive agreements for implementing the Objects of the Issue.

For more information, please refer to “Objects of the Issue” on page 67 of the Draft Prospectus.

36. *Our Company’s management will have flexibility in utilizing the Net Proceeds from the Issue. The deployment of the Net Proceeds from the Issue is not subject to any monitoring by any independent agency.*

Our Company intends to primarily use the Net Proceeds towards working capital requirement and for general corporate purposes as described in “Objects of the Issue” on page 67 of this Draft Prospectus. In terms of SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹100 crores. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company’s management regarding the application of the Net Proceeds from the Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue, our business and financial results may suffer.

37. *We have not identified any alternate source of raising the funds mentioned as our ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

Our Company has not identified any alternate source of funding for our working capital requirement and for general corporate purposes and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may require our Company to borrow funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the Company.

For further details of our Object for the Issue, please refer chapter titled “Object for the Issue” beginning on Page 67 of this Draft Prospectus.

38. One of our trademark is pending for approval and other is not registered. Such failure to protect our intellectual property rights could adversely affect our competitive position, business, financial condition and profitability.

Our Company is using two trademark, out of which one of our trademark is pending for approval and other is not registered. The registration of any intellectual property right is a time-consuming process, and there can be no assurance that any such registration will be granted. For details please refer to the chapter “Government and other Approvals” on page 160 of this Draft Prospectus. In the absence of such registration, competitors or other companies may challenge the validity or scope of our intellectual property. Unless our trademarks are registered, we may only get passing off relief for our Trademarks, if used by others, which could materially and adversely affect our business. Similarly, in case our trademark are rejected or objected, this could adversely affect our competitive position, business, financial condition and profitability.

Further, if our unregistered trademarks are registered in favour of a third party, we may not be able to claim registered ownership of such trademarks, and consequently, we may be unable to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities. Our inability to obtain or maintain registration may adversely affect our competitive business position.

39. There may be potential conflicts of interest if our Director are involved in any business activities that compete with or are in the same line of activity as our business operations.

Our Director’s/Promoter’s sole proprietorship firm such as Jain Enterprises and Sunrise Enterprises and our Promoter’s Manish Kumar Jain HUF firm MRP Agro Distributors is involved in similar line of business of trading of food grains. Further, we have not entered into any non-compete agreement with our said entities. We cannot assure you that our Director/Promoter who has common interest in said entities will not favour the interest of the said entities As a result; conflicts of interests may arise in allocating business opportunities amongst our Company and our Group Entities in circumstances where our respective interests diverge. There can be no assurance that our Director or our Promoter or our Group Entities or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

40. If there is a change in policies related to tax, duties or other such levies applicable to us, it may affect our results of operations.

We benefit from certain general tax regulations and incentives that accord favorable treatment to certain of our operations as well as for our activities. These tax benefits include income tax deductions and other taxes. For details regarding income tax deductions, please refer to the chapter “Statement of Special Tax Benefits” on page 73 of this Draft Prospectus.

New or revised accounting policies or policies related to tax, duties or other such levies promulgated from time to time by the relevant authorities may significantly affect our results of operations. We cannot assure you that we would continue to be eligible for such lower tax rates or any other benefits. The reduction or termination of our tax incentives, or non-compliance with the conditions under which such tax incentives are made available, will increase our tax liability and affect our business, prospects, results of operations and financial condition.

41. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders’ rights under Indian law may not be as extensive as shareholders’ rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such

securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

42. Our Equity Shares have never been publicly traded and may experience price and volume fluctuations following the completion of the Issue, an active trading market for the Equity Shares may not develop, the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Issue Price or at all.

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for our Equity Shares will develop or, if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is determined considering various financial factors of the Company and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. There has been significant volatility in the Indian stock markets in the recent past, and the trading price of our Equity Shares after this Issue could fluctuate significantly as a result of market volatility or due to various internal or external risks, including but not limited to those described in this Draft Prospectus. A decrease in the market price of our Equity Shares could cause you to lose some or all of your investment.

43. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not have permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder's investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" on page 166 of this Draft Prospectus.

44. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined on the basis of the Fixed Price Issue. This price is based on numerous factors. For further information, see "Basis for Issue Price" beginning on page 71 of this Draft Prospectus. This issue price may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

45. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

46. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.*

Our Promoters average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price as may be decided by the Company, in consultation with the LM. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapters “Capital Structure” beginning on page 50 of this Draft Prospectus.

47. *The requirements of being a listed company may strain our resources and distract management.*

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur additional legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulation, 2015 which would require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we delay making such filings, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

48. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company’s Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company’s Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company’s major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

49. *We have in the last 12 months issued Equity Shares at a price that may be at lower than the Issue Price.*

In the last 12 months we may have issued fresh Equity Shares to the promoters and other shareholders of our Company which are as follows: -

- Right issue of Equity Shares dated May 08, 2020 issuing 2,47,000 Equity shares of Rs 10 each at a premium of Rs 15.00 per equity share.

- Right issue of Equity Shares dated May 15, 2020 issuing 6,30,000 Equity shares of Rs 10 each at a premium of Rs 15.00 per equity share.
- Bonus Issue of Equity Shares dated September 21, 2020 issuing 6,19,740 Equity shares face value Rs 10/- per Equity Share.

The Equity Shares allotted to investors pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions and passage of time.

For Further details of equity shares issued, please refer to the chapter titled “Capital Structure” beginning on page 50 of the Draft Prospectus.

50. We will continue to be controlled by our Promoters and Promoter Group after the listing of the Equity Shares in the Issue.

Upon successful completion of the Issue, our Promoters and Promoter Group will collectively control, directly or indirectly, approximately 93.17% of our outstanding Equity Shares (assuming full subscription to the Issue). As a result, our Promoters and Promoter Group will continue to have the ability to exercise significant control over our Company and all matters requiring shareholder approval, including election of directors, our business strategy and policies, and approval of significant corporate transactions such as mergers and business combinations. The extent of their shareholding in our Company may also have the effect of delaying, preventing or deterring a change in control of our Company, even if such a transaction may be beneficial to the other shareholders. The interests of our Promoters and Promoter Group as controlling shareholders of our Company could be in conflict with the interests of our other shareholders. We cannot assure you that our Promoters and Promoter Group will act to resolve any conflicts of interest in favor of our Company or the other shareholders.

For Further details of Capital Buildup, please refer to the chapter titled “Capital Structure” beginning on page 50 of the Draft Prospectus.

51. The interests of the Promoter as our controlling shareholder may conflict with the interests of other shareholders.

Under our Articles of Association, the Promoter, by holding a majority of our Equity Share capital may issue directives with respect to the conduct of our business or our affairs, as defined under the Companies Act. The interests of the Promoter may be different from our interests or the interests of other shareholders. As a result, the Promoter may take actions with respect to our business and the businesses of our peers and competitors. In addition, as a result of our controlling ownership by the Promoter, we are required to adhere to certain restrictions with respect to the types of investments we may make using our cash balances, which may restrict us from entering into certain investments providing a higher rate of return. The Promoter will retain control over the decisions requiring adoption by our shareholders and could exercise its powers of control, delay or defer or initiate a change of control of our Company or a change in our capital structure.

EXTERNAL RISK FACTORS

52. If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business, and results of operations.

Any change in tax laws, including for indirect taxes, may result in us no longer being able to enjoy the existing exemptions / benefits, available to us, which could adversely impact our profitability. If there is an upward revision to the currently applicable special corporate tax rates, our tax burden will increase. Other benefits such as inapplicability of minimum alternate tax rates, as applicable to other corporates, exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds.

We cannot predict whether any tax laws or regulations impacting loans or financial products will be enacted, the nature and impact of the specific terms of any such laws or regulations will be or whether, if at all, any laws or regulations would have a material adverse effect business, results of operations and financial condition.

53. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations and prospects.

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business, including those relating to the Internet and e-commerce, consumer protection and privacy. Such unfavorable changes could decrease demand for our products, increase costs

and/or subject us to additional liabilities. Furthermore, the growth and development of e-commerce may result in more stringent consumer protection laws that may impose additional burdens on online businesses generally.

The application of various Indian and international sales, use, occupancy, value-added and other tax laws, rules and regulations to our services and products is subject to interpretation by the applicable taxing authorities. Many of the statutes and regulations that impose these taxes were established before the growth of the Internet, mobile networks and e-commerce. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, particularly with respect to occupancy or value-added or other taxes, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties and, even if we are able to pass on such costs to our customers, such action would decrease the demand for our services and products. As a result, any such changes could have an adverse effect on our business and results of operation. Further, the uncertainty in relation to change of laws, rules and regulations may lead to unpredictability and negatively impact our ability to manage our business prospects.

For example, in India, as of July 1, 2017, GST replaced taxes levied by central and state governments with a unified tax regime in respect of certain goods and services for the whole of India. However, given the recent introduction of the GST in India, there is no well-established practice regarding the implementation of, and compliance with, GST. Further, as GST is implemented, we cannot assure you that we will not be required to comply with additional procedures or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. As the taxation system in India will see significant changes as a result of GST, its consequent effects cannot be determined at present and we cannot assure you that such effects will not have a material adverse effect our business, future financial performance and the trading price of the Equity Shares.

The application of GST and other applicable laws, rules and regulations to our business now or in the future, may be subject to interpretation by relevant authorities, and, if amended or notified, could result in increased tax payments to us (prospectively or retrospectively), which could affect our business, prospects, financial condition and results of operations. Further, there is a risk that the Indian Income Tax Department may assess our tax liability to be materially different from the provision that we have carried in our books for the past periods.

Separately, unfavorable changes in existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in applicability or implementation of any amendment to, or change in, law, regulation or policy, including due to an absence, or a limited body, of administrative or judicial precedent may be time consuming and costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

54. Recent global economic conditions have been unprecedented and challenging and continue to affect the Indian market, which may adversely affect our business, financial condition, results of operations and prospects.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall. Any persisted or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections. In Europe, the exit of the United Kingdom from the European Union, and any prolonged period of uncertainty which results, could have a significant negative impact on international markets. These could include further falls in stock exchange indices and/or greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets.

There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In particular, as China is one of India's major trading partners, there are raising concerns regarding the United States limiting trade and/or imposing a tariff on imports from China and of a possible slowdown in the Chinese economy. Such factors might also result in a slowdown in India's export growth momentum and could materially and adversely affect our operating results and financial performance.

In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have a material adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares. Adverse economic developments overseas in countries where we have operations could have a material adverse effect on our business and the trading price of the Equity Shares.

55. An outbreak of an infectious disease or any other serious public health concerns in Asia or elsewhere could adversely affect our business.

The outbreak of an infectious disease in Asia or elsewhere or any other serious public health concern, such as Covid-19, which is currently having a negative impact on the global economy, financial markets and business activities worldwide, which also turn adversely affect our business. Although, we can give no assurance that a future outbreak of a similar infectious disease or any other serious public health concern will not have a material adverse effect on our business.

Despite precautionary measures for our business, there can be no guarantee that it will not be affected in the future in case of an outbreak of any such contagious disease. If a wide spread of disease have affected the Indian market, we may not be able to cater customers. An outbreak of a disease, whether directly impact our supply or not, may attract negative publicity resulting in declining demand. As a result of these and other factors, any outbreak of disease, or the possibility of an outbreak of disease could adversely affect our business, financial condition and results of operations.

56. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets.

In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

57. Our business and activities may be further regulated by the Competition Act and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.

The Competition Act seeks to prevent business practices that have or are likely to have an appreciable adverse effect on competition in India and has established the Competition Commission of India (the "CCI"). Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which has or is likely to have an appreciable adverse effect on competition is void and attracts substantial penalties. Any agreement among competitors which, directly or indirectly, determines purchase or sale prices, results in bid rigging or collusive bidding, limits or controls the production, supply or distribution of goods and services, or shares the market or source of production or providing of services by way of allocation of geographical area or type of goods or services or number of customers in the relevant market or in any other similar way, is presumed to have an appreciable adverse effect on competition and shall be void.

Further, the Competition Act prohibits the abuse of a dominant position by any enterprise. If it is proven that a breach of the Competition Act committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the breach themselves and may be punished as an individual. If we, or any of our employees are penalized under the Competition Act, our business may be adversely affected. Further, the Competition Act also regulates combinations and requires approval of the CCI for effecting any acquisition of shares, voting rights, assets or control or mergers or amalgamations above the prescribed asset and turnover based thresholds.

On March 4, 2011, the Government of India notified and brought into force new provisions under the Competition Act in relation to combined entities (the “Combination Regulation Provisions”), which came into effect from June 1, 2011. The Combination Regulation Provisions require that any acquisition of shares, voting rights, assets or control or mergers or amalgamations, which cross the prescribed asset and turnover based thresholds, must be notified to and preapproved by the CCI. In addition, on May 11, 2011, the CCI issued the final Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 (as amended). These regulations, as amended, set out the mechanism for the implementation of the Combination Regulation Provisions under the Competition Act.

58. A significant change in the Government of India’s economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.

The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavorable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. However, the members of the Government of India and the composition of the coalition in power are subject to change. As a result, it is difficult to predict the economic policies that will be pursued by the Government of India. For example, there may be an increasing number of laws and regulations pertaining to the internet and ecommerce, which may relate to liability for information retrieved from or transmitted over the internet or mobile networks, user privacy, content restrictions and the quality of services and products sold or provided through the internet.

The rate of economic liberalization could change and specific laws and policies affecting the financial services industry, foreign investment, currency exchange and other matters affecting investment in our securities could change as well. Any significant change in India’s economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

59. Companies in India are required to prepare financial statements under the new Indian Accounting Standards. In addition, all income-tax assessee in India will be required to follow the Income Computation and Disclosure Standards.

The Ministry of Corporate Affairs (“MCA”), Government of India, has through notification dated February 16, 2015 issued the Indian Accounting Standards Rules, 2015 (“Ind AS”) which have come into effect from April 1, 2015 and are applicable to companies which fulfill certain conditions. Further, there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

Further, the Ministry of Finance, Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards (“ICDS”), thereby creating a new framework for computation of taxable income. The ICDS shall apply from the assessment year 2017-2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

60. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which investors may be more familiar with and may consider material to their assessment of our financial condition.

Our financial statements are prepared and presented in conformity with Indian GAAP. No attempt has been made to reconcile any of the information given in this document to any other principles or to base it on any other standards. Indian GAAP differs in certain significant respects from IFRS, U.S. GAAP and other accounting principles with which prospective investors may be familiar in other countries. If our financial statements were to be prepared in accordance with such other accounting principles, our results of

operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our financial statements, and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar.

GLOBAL OUTLOOK

The COVID-19 pandemic has spread with astonishing speed to every part of the world and infected millions. The health and human toll is already large and continues to grow, with hundreds of thousands of deaths and many more suffering from diminished prospects and disrupted livelihoods. The pandemic represents the largest economic shock the world economy has witnessed in decades, causing a collapse in global activity. Various mitigation measures—such as lockdowns, closure of schools and non-essential business, and travel restrictions—have been imposed by most countries to limit the spread of COVID-19 and ease the strain on health care systems. The pandemic and associated mitigation measures have sharply curbed consumption and investment, as well as restricted labor supply and production. The cross-border spillovers have disrupted financial and commodity markets, global trade, supply chains, travel, and tourism.

Financial markets have been extremely volatile, reflecting exceptionally high uncertainty and the worsening outlook. Flight to safety led to a sharp tightening of global and EMDE financial conditions. Equity markets around the world plunged, spreads on riskier categories of debt widened considerably, and EMDEs experienced large capital outflows in much of March and April that bottomed out only recently. Commodity prices have declined sharply as a result of falling global demand, with oil particularly affected.

Many countries have provided large-scale macroeconomic support to alleviate the economic blow, which has contributed to a recent stabilization in financial markets. Central banks in advanced economies have cut policy rates and taken other far-reaching steps to provide liquidity and to maintain investor confidence. In many EMDEs, central banks have also eased monetary policy. The fiscal policy support that has been announced already far exceeds that enacted during the 2008-09 global financial crisis.

In all, the pandemic is expected to plunge a majority of countries into recession this year, with per capita output contracting in the largest fraction of countries since 1870. Advanced economies are projected to shrink by 7 percent in 2020, as widespread social-distancing measures, a sharp tightening of financial conditions, and a collapse in external demand depress activity. Assuming that the outbreak remains under control and activity recovers later this year, China is projected to slow to 1 percent in 2020—by far the lowest growth it has registered in more than four decades.

Due to the negative spillovers from weakness in major economies, alongside the disruptions associated with their own domestic outbreaks, EMDE GDP is forecast to contract by 2.5 percent in 2020. This would be well below the previous trough in EMDE growth of 0.9 percent in 1982, and the lowest rate since at least 1960, the earliest year with available aggregate data. EMDEs with large domestic COVID-19 outbreaks and limited health care capacity; that are deeply integrated in global value chains; that are heavily dependent on foreign financing; and that rely extensively on international trade, commodity exports, and tourism will suffer disproportionately. Commodity-exporting EMDEs will be hard hit by adverse spillovers from sharply weaker growth in China, and by the collapse in global commodity demand, especially for oil. With more than 90 percent of EMDEs expected to experience contractions in per capita incomes this year, many millions are likely to fall back into poverty.

With advanced economies contracting, China experiencing record-low growth, and EMDE growth savaged by external and domestic headwinds, the global economy is expected to shrink by 5.2 percent this year in a baseline forecast. This would be the deepest global recession since World War II, and almost three times as steep as the 2009 global recession. The forecast assumes that the pandemic recedes in such a way that domestic mitigation measures can be lifted by mid-year, adverse global spillovers ease during the second half of the year, and dislocations in financial markets are not longlasting. Although a moderate recovery is envisioned in 2021, with global growth reaching 4.2 percent, output is not expected to return to its previously expected levels.

Since uncertainty around the outlook remains exceptionally high, alternative scenarios help illustrate the range of plausible global growth outcomes in the near term. In particular, the baseline forecast for 2020 could prove optimistic. If COVID-19 outbreaks persist longer than expected, restrictions on movement and interactions may have to be maintained or reintroduced, prolonging the

disruptions to domestic activity and further setting back confidence. Disruptions to activity would weaken businesses' ability to remain in operation and service their debt, while the increase in risk aversion could raise interest rates for higher-risk borrowers. With debt levels already at historic highs, this could lead to cascading defaults and financial crises across many economies. Under this downside scenario, global growth would shrink almost 8 percent in 2020. The recovery that follows would be markedly sluggish, hampered by severely impaired balance sheets, heightened financial market stress and widespread bankruptcies in EMDEs. In 2021, global growth would barely begin to recover, increasing to just over 1 percent.

In contrast, in an upside scenario, a sharp economic rebound would begin promptly if pandemic-control measures could be largely lifted in the near term, and fiscal and monetary policy responses succeed in supporting consumer and investor confidence, leading to a prompt normalization of financial conditions and the unleashing of pent-up demand. However, even with these positive developments, the near-term contraction in global activity of more than 3 percent in 2020 would still be much larger than during the global recession of 2009, and EMDE growth would also be negative. Once pandemic control measures are fully lifted, global growth would rebound markedly in 2021, to above 5 percent.

Policymakers face formidable challenges as they seek to contain the devastating health, macroeconomic, and social effects of the pandemic. During the last global recession, in 2009, many EMDEs were able to implement large-scale fiscal and monetary responses. Today, however, many EMDEs are less prepared to weather a global downturn and must simultaneously grapple with a severe public health crisis with heavy human costs. Particularly vulnerable EMDEs include those that have weak health systems; those that rely heavily on global trade, tourism, and remittances; those that are prone to financial market disruptions; and those that depend on oil and other commodity exports. EMDEs where poverty and informality are widespread, including many low-income countries, are also vulnerable, since their poor have limited access to proper sanitation and adequate social safety nets, and often suffer greater food insecurity.

An arsenal of macro prudential support policies has been deployed in EMDEs to maintain financial sector resilience and promote lending during the crisis. These include relaxing capital and liquidity coverage requirements, allowing banks to draw down capital and liquidity buffers, and encouraging banks to offer temporary loan repayment holidays to distressed borrowers. Further, many countries have initiated debt moratoria and government guarantees on bank loans to strengthen bank balance sheets and support distressed borrowers. Policymakers would, however, need to carefully balance some of these actions against jeopardizing the future stability of the financial sector. Once economic activity begins to normalize, they will also need to prudently withdraw the large-scale policy stimulus provided during the crisis without endangering the recovery.

Meanwhile, many EMDEs have introduced fiscal measures to expand social safety nets and protect those most vulnerable, including wage support to preserve jobs, increased access to unemployment benefits, and targeted cash transfers to low-income households. In EMDEs with wider fiscal space, the policy response has been markedly greater than in those more constrained by higher debt levels (Figure 1.2.D). For many energy-exporting EMDEs, fiscal balances are deteriorating as oil prices have fallen below fiscal break-even prices. Elevated debt burdens in some low- and middle income countries also underscore the need for temporary debt relief. In this context, global coordination and cooperation—of the measures needed to slow the spread of the pandemic, and of the economic actions needed to alleviate the economic damage, including international support—provide the greatest chance of achieving public health goals and enabling a robust global recovery.

In the near term, COVID-19 has underscored the need for governments to prioritize the timely and transparent dissemination of accurate information in order to stem the spread of the disease, and to build public trust. In the long term, the pandemic has laid bare the weaknesses of national health care and social safety nets in many countries. It has also exposed the severe consequences of widespread informality and financing constraints for small and medium enterprises (SMEs) in many EMDEs. There is a critical need to invest in resilient health care systems that prioritize national health security, in order to prevent and mitigate similar crises.

It is also necessary to put in place social benefit systems that can provide an effective, flexible, and efficient safety net during disasters. Such systems can be augmented by measures to deliver income support and emergency financing to vulnerable groups such as the poor, urban slum dwellers, migrants, and informal firms. In particular, digital technologies can enhance the provision of cash transfers and other critical support measures, as well as facilitate the flow of remittances.

In many countries, deep recessions triggered by COVID-19 will likely weigh on potential output for years to come. Governments can take steps to alleviate the adverse impact of the crisis on potential output by placing a renewed emphasis on reforms that can boost long-term growth prospects.

The Global Economic Outlook during the COVID-19 Pandemic: A Changed World

The Covid-19 pandemic has spread with alarming speed, infecting millions and bringing economic activity to a near-standstill as countries imposed tight restrictions on movement to halt the spread of the virus. As the health and human toll grows, the economic damage is already evident and represents the largest economic shock the world has experienced in decades.

The June 2020 Global Economic Prospects describes both the immediate and near-term outlook for the impact of the pandemic and the long-term damage it has dealt to prospects for growth. The baseline forecast envisions a 5.2 percent contraction in global GDP in 2020, using market exchange rate weights—the deepest global recession in decades, despite the extraordinary efforts of governments to counter the downturn with fiscal and monetary policy support. Over the longer horizon, the deep recessions triggered by the pandemic are expected to leave lasting scars through lower investment, an erosion of human capital through lost work and schooling, and fragmentation of global trade and supply linkages.

The crisis highlights the need for urgent action to cushion the pandemic’s health and economic consequences, protect vulnerable populations, and set the stage for a lasting recovery. For emerging market and developing countries, many of which face daunting vulnerabilities, it is critical to strengthen public health systems, address the challenges posed by informality, and implement reforms that will support strong and sustainable growth once the health crisis abates.

Historic contraction of per capita income

The pandemic is expected to plunge most countries into recession in 2020, with per capita income contracting in the largest fraction of countries globally since 1870. Advanced economies are projected to shrink 7 percent. That weakness will spill over to the outlook for emerging market and developing economies, who are forecast to contract by 2.5 percent as they cope with their own domestic outbreaks of the virus. This would represent the weakest showing by this group of economies in at least sixty years.

Most countries are expected to face recessions in 2020

Every region is subject to substantial growth downgrades. East Asia and the Pacific will grow by a scant 0.5%. South Asia will contract by 2.7%, Sub-Saharan Africa by 2.8%, Middle East and North Africa by 4.2%, Europe and Central Asia by 4.7%, and Latin America by 7.2%. These downturns are expected to reverse years of progress toward development goals and tip tens of millions of people back into extreme poverty.

Emerging market and developing economies will be buffeted by economic headwinds from multiple quarters: pressure on weak health care systems, loss of trade and tourism, dwindling remittances, subdued capital flows, and tight financial conditions amid mounting debt. Exporters of energy or industrial commodities will be particularly hard hit. The pandemic and efforts to contain it have triggered an unprecedented collapse in oil demand and a crash in oil prices. Demand for metals and transport-related

commodities such as rubber and platinum used for vehicle parts has also tumbled. While agriculture markets are well supplied globally, trade restrictions and supply chain disruptions could yet raise food security issues in some places.

A possibility of even worse outcomes

Even this bleak outlook is subject to great uncertainty and significant downside risks. The forecast assumes that the pandemic recedes in such a way that domestic mitigation measures can be lifted by mid-year in advanced economies and later in developing countries, that adverse global spillovers ease during the second half of 2020, and that widespread financial crises are avoided. This scenario would envision global growth reviving, albeit modestly, to 4.2% in 2021.

However, this view may be optimistic. Should COVID-19 outbreaks persist, should restrictions on movement be extended or reintroduced, or should disruptions to economic activity be prolonged, the recession could be deeper. Businesses might find it hard to service debt, heightened risk aversion could lead to climbing borrowing costs, and bankruptcies and defaults could result in financial crises in many countries. Under this downside scenario, global growth could shrink by almost 8% in 2020.

Looking at the speed with which the crisis has overtaken the global economy may provide a clue to how deep the recession will be. The sharp pace of global growth forecast downgrades points to the possibility of yet further downward revisions and the need for additional action by policymakers in coming months to support economic activity.

The COVID-19 recession has seen the fastest, steepest downgrades in consensus growth projections among all global recessions since 1990

Consensus forecasts of global GDP (percent)

A particularly concerning aspect of the outlook is the humanitarian and economic toll the global recession will take on economies with extensive informal sectors that make up an estimated one-third of the GDP and about 70% of total employment in emerging market and developing economies. Policymakers must consider innovative measures to deliver income support to these workers and credit support to these businesses.

Long-term damage to potential output, productivity growth

The June 2020 Global Economic Prospects looks beyond the near-term outlook to what may be lingering repercussions of the deep global recession: setbacks to potential output—the level of output an economy can achieve at full capacity and full employment—and labor productivity. Efforts to contain COVID-19 in emerging and developing economies, including low-income economies with limited health care capacity, could precipitate deeper and longer recessions—exacerbating a multi-decade trend of slowing potential

growth and productivity growth. Many emerging and developing economies were already experiencing weaker growth before this crisis; the shock of COVID-19 now makes the challenges these economies face even harder.

With the recession having deep effects on potential output, reforms that bolster long-term growth prospects will be essential

Another important feature of the current landscape is the historic collapse in oil demand and oil prices. Low oil prices are likely to provide, at best, temporary initial support to growth once restrictions to economic activity are lifted. However, even after demand recovers, adverse impacts on energy exporters may outweigh any benefits to activity in energy importers. Low oil prices offer an opportunity to oil producers to diversify their economies. In addition, the recent oil price plunge may provide further momentum to undertake energy subsidy reforms and deepen them once the immediate health crisis subsides.

In the face of this disquieting outlook, the immediate priority for policymakers is to address the health crisis and contain the short-term economic damage. Over the longer term, authorities need to undertake comprehensive reform programs to improve the fundamental drivers of economic growth once the crisis lifts.

Policies to rebuild both in the short and long-term entail strengthening health services and putting in place targeted stimulus measures to help reignite growth, including support for the private sector and getting money directly to people. During the mitigation period, countries should focus on sustaining economic activity with support for households, firms and essential services.

Global coordination and cooperation—of the measures needed to slow the spread of the pandemic, and of the economic actions needed to alleviate the economic damage, including international support—provide the greatest chance of achieving public health goals and enabling a robust global recovery.

Government Initiatives

The first Union Budget of the third decade of 21st century was presented by Minister for Finance & Corporate Affairs, Ms Nirmala Sitharaman in the Parliament on February 1, 2020. The budget aimed at energising the Indian economy through a combination of short-term, medium-term, and long-term measures.

Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Mr Narendra Modi, Prime Minister of India, launched Make in India initiative with an aim to boost country's manufacturing sector and increase purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25 per cent of the GDP from the current 17 per cent. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Some of the recent initiatives and developments undertaken by the Government are listed below:

- The Prime Minister of India, Mr. Narendra Modi announced various economic packages, having a cumulative worth of around Rs 20 lakh crore (US\$ 283.73 billion) and being almost 10 per cent of India's GDP.
- Pradhan Mantri Garib Kalyan Package (PMGK) was introduced in April 2020 to provide relief to underprivileged and help them fight the battle against COVID-19. The budget allocated to the scheme was Rs 1.70 lakh crore (US\$ 24.12 billion).

- Under the Pradhan Mantri Awas Yojana (Urban), Government has sanctioned more than 96.50 lakh houses under PMAY(U) and approved 606 proposals for the construction of 3,31,075 houses with an overall investment of Rs 15,125 crore (US\$ 2.16 billion).
- The Cabinet Committee on Economic Affairs has approved to increase the authorized capital of Food Corporation of India (FCI) from the existing Rs 3,500 crore (US\$ 500.79 million) to Rs 10,000 crore (US\$ 1.43 billion).
- India has registered a 26.9 per cent reduction in Maternal Mortality Ratio (MMR) since 2013: Sample Registration System Bulletin-2016.
- Around 26.02 million households were electrified by 31st March 2019 under Pradhan Mantri Sahaj Bijli Har Ghar Yojana (SAUBHAGYA).
- In the mid-term review of Foreign Trade Policy (FTP) 2015-20, the Ministry of Commerce and Industry enhanced the scope of Merchandise Exports from India Scheme (MEIS) and Service Exports from India Scheme (SEIS), increased MEIS incentive for ready-made garments and made-ups by 2 per cent, SEIS incentive by 2 per cent and increased the validity of Duty Credit Scrips from 18 months to 24 months. In April 2020, Government extended FTP for one more year (up to March 31, 2021).

Road Ahead

India's GDP is expected to reach US\$ 5 trillion by FY25 and achieve upper-middle income status on the back of digitization, globalization, favorable demographics, and reforms.

India is also focusing on renewable sources to generate energy. It is planning to achieve 40 per cent of its energy from non-fossil sources by 2030, which is currently 30 per cent, and have plans to increase its renewable energy capacity from to 175 gigawatt (GW) by 2022.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behavior and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government, the FDI Policy (as defined below) and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

Subscription by foreign investors (NRIs/FPIs)

FPIs are permitted to subscribe to Equity Shares of an Indian Company in a public Issue without the prior approval of the RBI, so long as the price of the Equity Shares to be issued is not less than the price at which the Equity Shares are issued to residents. SEBI registered FPIs have been permitted to purchase shares of an Indian company through Issue, subject to total FPI investment being within the individual FPI/sub account investment limit of 10 per cent subject to the total sectoral cap of all FPIs/sub-accounts put together being 24 per cent of the paid-up capital of the Indian company.
